◆ Role Playing Zone

◆ Rock climbing trampoline area

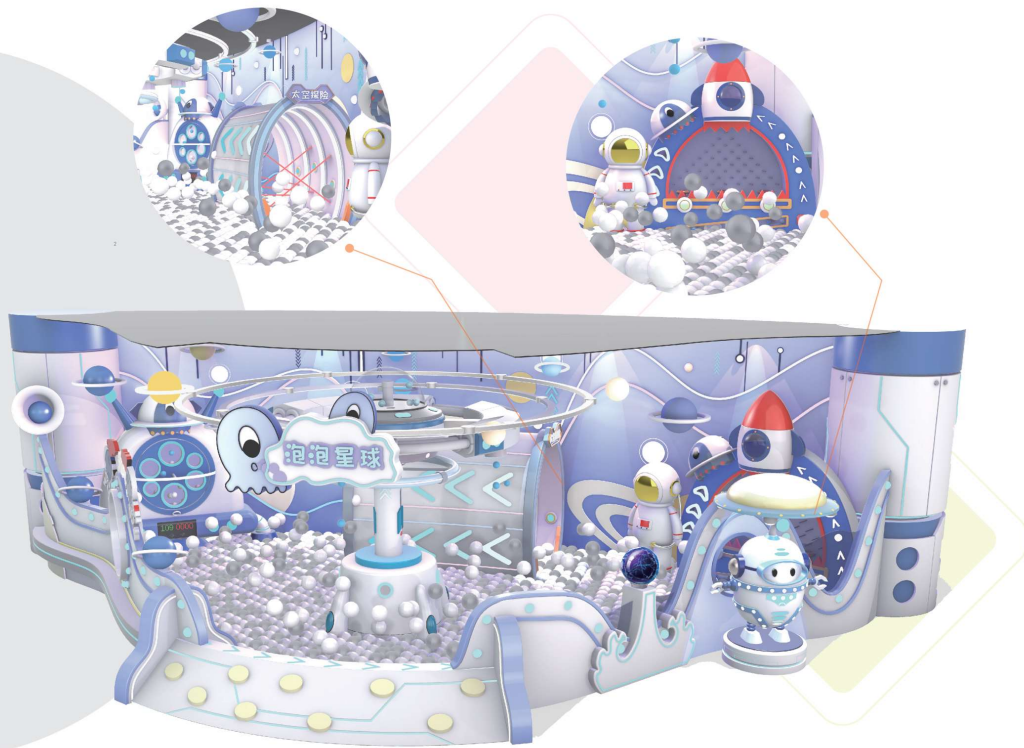

◆ Wall Interactive Game

◆ Sports and Expansion Equipment (sports park)

### INTERACTIVE BALL MACHINE

**Automatic ball suction cycle function:**  
The ball can be automatically sucked from the ball opening at the bottom of the device to the top (players can also release the ball manually), and then fall over from the top. The balls that fall into the ball pool will be sucked up again, forming a continuous cycle.

**Automatic start and stop function:**  
The automatic start and stop function is set inside to protect the equipment and solve the problem of high maintenance rate of interactive equipment.

### SHENZHOU PITCHING MACHINE

**Innovative rotation function:**  
Breaking through the traditional static pitching interaction, the pitching ports of three specifications rotate 360 degrees to increase the difficulty of pitching and increase the fun of interaction.

**Points statistics function:**  
Using automatic sensing technology, the real-time scoring function is integrated into the pitching machine to intuitively display the pitching results and stimulate children's self-challenge mentality.

### INTERACTIVE INDUCTION TUNNEL

**Human body recognition sensor:**  
The device incorporates a new human body recognition sensor. The tunnel lights will automatically light up when players approach, attracting players' attention and stimulating the atmosphere of the venue.

**Shuttle interaction:**  
Interactive sound effects are embedded inside the tunnel, and inter-twined mesh ropes are incorporated as obstacles to increase the challenge of interaction.
